General Information:

Capelin are members of the Osmeridae family of smelts. They are known as sparring in England. Capelin are slender translucent olive colored, small-scaled fish that grow to a maximum length of 25 cm (10 in). Capelin was once the primary food of cod in the North Atlantic. When the cod population diminished the capelin population increased drastically.

Latin Name:

Mallotus villosus

Fishing Season:

Seasons runs May thru July.

Average size and Weight:

Small-scaled fish that grow to a maximum length of 25 cm (10 in)
