## General Information:

Smelt are pelagic (occurring within the mid-water column), usually travelling in schools less than one mile from shore and in water less than 19 feet deep. Their movement patterns are associated with seasonal changes in water temperatures. In summer, schools move to deeper, cooler waters; in the fall they enter bays and estuaries where they actively feed until the onset of winter.

## Latin Name:

*Odontesthes regia*

## Fishing Season:

March through August (Fall/Winter season in Peru). Cold water species which can be impacted by El Nino phenomena.

## Average size and Weight:

Smelt may reach 13 to 14 inches in length, but most adults do not exceed 7" to 9" length and about 1 to 6 ounces in weight. Few smelt live beyond 5 years of age.

## Product Available / Frozen

Retail package lb. (16oz) clear poly bag with two color artwork.  
Whole round 12 lb packages

## Sensory Characteristics:

Clean "Ocean-fresh" smell, with slight cucumber aroma natural to this species.

COOL: wild caught, Peru

## Ingredients:

Peruvian Smelts

## Quality Control: HACCP
